Section I. Energy loss, excitation, capture/loss

Energy loss of fast heavy ions in plasmas
D.H.H. Hoffmann, J. Jacoby, W. Laux, M. de Magistris, E. Boggasch, P. Spiller, C. Stöckl, A. Tauschwitz, K. Weyrich, M. Chabot and D. Gardes 1

On the treatment of light-ion electronic stopping in dense matter
G. Schiwietz and P.L. Grande 10

Energy-loss differences of alpha particles in ferromagnetic and paramagnetic solids
F. Nickel, H. Folger, H. Geissel, E. Jäger, D. Marx, G. Münzenberg and C. Scheidenberger . . . 20

Interactions of slow H, H_2, and H_3 with thin carbon foils
H.O. Funsten, B.L. Barraclough and D.J. McComas 24

Comparative study of elastic scattering of low-energy electrons, positrons and protons in solids
J. Kawata and K. Ohya 29

Nonlinear hydrodynamic theory of electronic stopping power
A. Arnau and E. Zaremba 32

Charge states and energy loss of relativistic heavy ions in matter
C. Scheidenberger, H. Geissel, Th. Stöhlker, H. Folger, H. Irnich, C. Kozhuharov, A. Magel, P.H. Mokler, R. Moshammer, G. Münzenberg, F. Nickel, M. Pfützner, P. Rymuza, W. Schwab, J. Ullrich and B. Voss 36

Impact-parameter dependence of the electronic energy loss and angle-dependent energy loss for ions traversing thin foils
Y. Xia, C. Tan and W.N. Lennard 41

The influence of target composition on the specific energy loss measured in transmission geometry
R. Golser, A. Schiefermüller and D. Semrad 45

Charge-exchange in cesium ions/atoms scattered or sputtered from metal surfaces
L. Pan, Y. Wang, F. Huang, D. Fang, J. Tang and F. Yang 49

Measurement of the stopping powers of He and H ions near their maximum values by backscattering from a multilayer target
L. Leblanc and G.G. Ross 54

Energy loss of partially stripped ions in pre-equilibrium frozen charge states
T. Kaneko 58

Calculation of the energy loss of fast multicharged ions in solids
Yu.N. Yavlinskii 62

Kinetic electron emission yield induced by H^+ and He^{2+} ions versus stopping power for Al, Cu, Ag and Au
O. Benka, E. Steinbauer and P. Bauer 64

0168-583X/94/$07.00 © 1994 – Elsevier Science B.V. All rights reserved

Electronic stopping power of atoms for ions
M. Moneta and J. Czerbniak 67
Proton energy loss in allotropic forms of carbon
I. Abril, R. Garcia-Molina and N.R. Arista 72
Ionization energy losses of clusters formed by Coulomb explosion of fast molecules and generation of high energy electron–positron pairs in matter
N.F. Shul'ga, V.V. Syshchenko and V.I. Truten' 76
Angular straggling associated with fluctuations in charge state of the projectile in grazing ion–surface scattering
M. Kato and K.J. Snowdon 80
Measuring the stopping power for alpha particles channeled in InP
D.W. Hetherington 84
Electronic energy loss of heavy ions colliding with atoms obtained from the harmonic oscillator model and from the shell-wise model
Y. Xia, C. Tan and W.N. Lennard 88
How good are interpolations in stopping power tabulations? The case of Rb and of Sr
Ch. Eppacher, G. Zemsauer and D. Semrad 92
The relaxation of strong electron excitations in solids induced by multicharged ion bombardment
Yu.N. Yavlinskii 96
A fast decay measurement of ion-induced luminescence: radiative and nonradiative annihilation of core holes produced in a BaF_2 single crystal
K. Kimura 100

Section II. Channeling phenomena

Energy loss of heavy ions at high velocity
J.U. Andersen, G.C. Ball, J.A. Davies, W.G. Davies, J.S. Forster, J.S. Geiger, H. Geissel and V.A. Ryabov 104
Measuring the magnetic moments of short-lived particles using channeling in bent crystals
V.V. Baublis, R.A. Carrigan Jr., D. Chen, P.S. Cooper, D.C. Daniels, A.V. Khanzadeev, J. Lach, A. Morelos, V.M. Samsonov, V.J. Smith, M.N. Strikhanov, C.R. Sun, N.K. Terentyev, S. Timm and A.A. Vorobyov 112
Effects on channeling of radiation damage due to 28 GeV protons
S.I. Baker, R.A. Carrigan Jr., V.R. Cupps II, J.S. Forster, W.M. Gibson and C.R. Sun 119
Low energy B-channeling in Si
K. Gärtner, D. Stock, C. Wende and M. Nitschke 124
Extraction from TeV-range accelerators using bent crystal channeling
R.A. Carrigan Jr., D. Chen, P. Colestock, D. Herrup, G. Goderre, G. Jackson, C.T. Murphy, R. Stefanski, S. Baker, N. Mokhov, B. Parker, H.-J. Shih, R. Soundranayagam, T. Toohig, S. Peggs, C.R. Sun, A. Boden, D. Cline, W. Gabella, S. Ramachandran, J. Rhoades, J. Rosenzweig, M. Arenton, S. Conetti, B. Cox, C. Dukes, V. Golovatyuk, A. McManus, K. Nelson, B. Norem, B. Newberger, J.A. Ellison, A. Erwin, R. Rossmanith, A. Kovalenko, A. Taratin, N. Malakhov, E. Tsyganov, M. Bavizhev, V. Biryukov, M. Maslov, A. Khanzadeev, T. Prokofieva, V. Samsonov and G. Solodov 128
A comparative study of coherent bremsstrahlung and channeling radiation
K. Chouffani, H. Überall, R. Dougherty, R. Fusina, H. Genz, P. Hoffmann-Stascheck, U. Nething and A. Richter 133
Channeling radiation from quasicrystals: methods
R.W. Dougherty and A.W. Sáenz 137
Close encounter processes in Monte Carlo simulations of ion channeling
A. Dygo, W.N. Lennard and I.V. Mitchell 142

Apparatus for magnetic moment measurement using channeling in bent crystals
V.V. Baublis, I.V. Ivanov, I.G. Ivochkin, A.V. Khanzadeev, V.V. Kuryatkov, E. Lapin, N.M. Miftakhov, V.F. Morozov, S.R. Novikov, T.J. Prokofieva, V.M. Samsonov, G. Solodov, B.D. Dvornikov, B.B. Loginov, Y.E. Koleson, A.A. Kochenova, R.A. Carrigan, Jr., D. Chen and M.N. Strikhanov 150

Kinetic equation approach in surface transmission for axial channeling
J.U. Andersen, V.A. Ryabov, A. Uguzzoni and E. Fuschini 156

Azimuthally averaged backscattering yield near the ⟨100⟩ axis in Si
A. Dygo, W.N. Lennard, I.V. Mitchell and P.J.M. Smulders 161

Axial channeling and blocking with restricted equilibrium in phase space
J.U. Andersen, B. Bech Nielsen, A. Uguzzoni, E. Fuschini, E.F. Kennedy and V.A. Ryabov . . . 166

Dielectronic recombination for He-like ^{79}Br ions channeled along the ⟨110⟩ direction in Ni
J.S. Forster, G.C. Ball, W.G. Davies, J.S. Geiger, J.U. Andersen, J. Chevallier, J.A. Davies and H. Geissel 172

Experiments and simulations on the effect of channeling on the ranges of 1 keV deuterons in silicon
G. Bourque, B. Terreault, G.G. Ross and D. Thériault 175

Deflection of high energy particles during multiple scattering by atomic strings of a bent crystal
A.A. Greenenko and N.F. Shul'ga 179

Role of angular momentum in multiple scattering and radiation processes for high energy electrons in crystals
V.A. Ryabov 183

Measurement of the linear polarization of channeling radiation
M. Rzepka, G. Buschhorn, E. Diedrich, R. Kotthaus, W. Kufner, W. Rößl, K.H. Schmidt, H. Genz, H.-D. Gräf, P. Hoffmann-Stascheck and A. Richter 186

Section III. Surface phenomena (growth, modification, scattering)

MD studies of the interactions of low energy particles and clusters with surfaces
R.S. Averback and M. Ghaly 191

Modelling of ballistic low energy ion solid interaction – conventional analytic theories versus computer simulations
U. Littmark 202

Position-dependent charge-exchange and energy-loss processes for MeV He ions near a crystal surface
Y. Fujii, S. Fujiwara, K. Narumi, K. Kimura and M.-h. Mannami 212

Image charge interaction of multicharged ions in grazing collisions with an Al(111)-surface
H. Winter and C. Auth 216

Resonant coherent ionization in grazing ion/atom–surface collisions at high velocities
F.J. García de Abajo and J.M. Pitarke 222

Surface investigations using monolayer-resolvable high-resolution Rutherford backscattering spectroscopy
K. Kimura, H. Ohtsuka, K. Ohshima and M.-h. Mannami 227

Studies of the interaction of slow very highly charged ions with solid surfaces using the LLNL EBIT facility
M.A. Briere, D. Schneider, J. McDonald, M. Reaves, C. Rühlicke, G. Weinberg and D. Knapp. 231

Determination of the structure of subsurface layers by means of coaxial time-of-flight scattering and recoiling spectrometry (TOF-SARS)
Y. Wang, S.V. Teplov and J.W. Rabalais 237

Z variations in yields of multicharged ions scattered and recoiled from a silicon surface
B. Hird, R.A. Armstrong and P. Gauthier 243

2 keV He and Ne ion scattering on a Cu(110) surface: experiment vs simulation
L. Houssiau and P. Bertrand 247
Energy loss in grazing proton–surface collisions
J.I. Juaristi and F.J. García de Abajo 252
Mechanisms of subthreshold atomic emission from solid surfaces
A.E. Kiv, M.A. Elango, E.P. Britavskaya and I.G. Zaharchenko 257
Electron emission in 10–100 keV H^+ and He^+ grazing ion–surface collisions
E.A. Sánchez, O. Grizzi, G. Nadal, G. Gómez, M.L. Martiarena and V.H. Ponce 261
Skipping motion of 30 keV H^+ ions on single crystal surface of KCl
K. Narumi, Y. Fujii, K. Kimura and M.-h. Mannami 266
Inelastic processes in Ne^+ collisions with a Mg surface; charge fractions and surface roughness
L. Guillemot, S. Lacombe, M. Huels, Vu Ngoc Tuan and V.A. Esaulov 270
Dynamical aspects of Auger neutralization in slow ion–surface collisions
Z.L. Mišković, B.L. Burrows, A.T. Amos and S.G. Davison 274
Surface channeling experiments on Pb(110)
M. Schleberger, S. Speller, C. Höfner and W. Heiland 274
Synthesis of carbon-nitride films using a fast-switched dual-source low energy ion beam deposition system
D. Marton, A.H. Al-Bayati, S.S. Todorov, K.J. Boyd and J.W. Rabalais 277
Convoy electrons measured in coincidence with exit charge states in ion–surface scattering
K. Kimura, T. Kishi and M.-h. Mannami 282
Comparison of experimental and simulated low energy alkali ion scattering
S.H. Overbury 286
Resonant electron transfer in ion–metal-surface interactions: scaling and universal behavior
U. Wille 295
Surface ionization by ion impact at grazing incidence
M.L. Martiarena, E.A. Sánchez, O. Grizzi and V.H. Ponce 300
Autoionising state excitation in collisions of inert gas projectiles with an Al surface and effects of initial stages of oxidation
V.A. Esaulov, L. Guillemot and S. Lacombe 305
Dissociation of fast HeH^+ ions at glancing angle scattering from a crystal surface
Y. Susuki, T. Ito, K. Kimura and M. Mannami 310

Section IV. Collision cascades, radiation damage and ranges

Defect evolution during ion bombardment of amorphous Si probed by in situ conductivity measurements
F. Priolo, S. Coffa and A. Battaglia 314
Effect of electron excitation on radiation damage in fcc metals
A. Iwase and T. Iwata 322
Effects induced by high electronic excitations in pure metals: a detailed study in iron
A. Dunlop, D. Lesueur, P. Legrand, H. Dammak and J. Dural 330
Surface swelling of sapphire induced by MeV and GeV heavy ions
R. Brenier, B. Canut, S.M.M. Ramos and P. Thevenard 339
Neutron-induced collision cascade mixing in Nb/V superlattices
D.E. Alexander, E.E. Fullerton, P.M. Baldo, C.H. Sowers and L.E. Rehn 344
The effect of alpha-particle and proton irradiation on the electrical and defect properties of n-GaAs
S.A. Goodman, F.D. Auret and W.E. Meyer 349
Collision cascades induced by aluminum clusters impacting on gold thin films
Z. Pan and J. Tang 354

Double plasmon excitation in an electron gas
J.M. Pitarke and R.H. Ritchie 358
Bulk atomic relocation in low-energy collision cascades in silicon: Molecular Dynamics versus Monte Carlo simulations
V. Konoplev, M.J. Caturla, I. Abril and A. Gras-Marti 363
Damage distributions in $LiNbO_3$ crystal induced by MeV F^+ tilted implantations
Z.-L. Wang, B.-R. Shi, K.-M. Wang, T.-B. Xu and P.-R. Zhu 369
Channeling effects and defect accumulation in ion implantation
M. Posselt 373
Metal–nonmetal transition in niobium thin layers implanted by nitrogen ions
A. Fedotov, F. Komarov and V. Yankovski 378
Range distribution of fluorine in $^{19}F^+$-implanted $LiNbO_3$
C. Tan, Y. Xia, X. Liu, J. Liu, J. Li, H. Yang and X. Sun 383
Electrical characteristics of neutron irradiation induced defects in n-GaAs
F.D. Auret, A. Wilson, S.A. Goodman, G. Myburg and W.E. Meyer 387
RBS studies of the lattice damage caused by 1 MeV Si^+ implantation into $Al_{0.3}Ga_{0.7}As/GaAs$ superlattices at elevated temperature
T.-B. Xu, P.-R. Zhu, J.-S. Zhou, D. Li, B. Gong, Y. Wan, S. Mu, Q.-T. Zhao and Z.-L. Wang . . 392
Thermalization of sparse collision cascades in metals: Simultaneous relaxation of nonequilibrium electron and ion distributions
I. Koponen and M. Hautala 396
H and D depth profiles in implanted and laser-annealed beryllium
F. Schiettekatte, D. Kéroack, G.G. Ross and B. Terreault 401
Radiation induced carbon complexes in gallium arsenide
C. Carlone, C. Rejeb, A. Jorio, M. Parenteau and S.M. Khanna 405
Thermal spike model of defect production by electron excitation in Cu
K. Yasui 409
Calorimetry of ion beam damage in silicon
S. Roorda, G. Kajrys and J. Graham 412

Section V. Ion implantation, annealing and mixing

Damage accumulation and amorphization in GaAs by MeV Si^+ ion implantation at different tilt angles
Q.-T. Zhao, Z.-L. Wang, T.-B. Xu, P.-R. Zhu and J.-S. Zhou 415
Determination by Raman scattering of the in depth damage profile in high energy ion implantation
R. Arès, Y.B. Trudeau, J.L. Brebner, G.E. Kajrys and M. Jouanne 419
Monte Carlo prediction of crater formation by single ion impact on solid surface
A.M.C. Pérez-Martín, J. Domínguez-Vázquez, J.J. Jiménez-Rodríguez, R. Collins and A. Gras-Martín 424
Ion beam mixing of Au marker in Pt and Pt marker in Au by 7 MeV Ag ions
J. Likonen, M. Hautala and I. Koponen 429
A three-dimensional relaxation model for calculation of atomic mixing and topography changes induces by ion beams
R. Collins, A.M.C. Pérez-Martín, J. Domínguez-Vázquez and J.J. Jiménez-Rodríguez 433
Density measurement of amorphous Si_xGe_{1-x} alloys
K. Laaziri, S. Roorda and L. Cliche 438
An ab initio Monte Carlo study of low energy positron and electron implantation in elemental metals and multilayers
V.J. Ghosh, M. McKeown, D.O. Welch and K.G. Lynn 442

High temperature silver ion implantation into glass
N.D. Skelland, J. Sharp and P.D. Townsend 446

Section VI. Sputtering and desorption

Transmission of low energy (< 10 eV) oxygen ions through ultrathin xenon films
N.J. Sack, M. Akbulut and T.E. Madey 451
Probabilistic and deterministic approaches to surface contour evolution during sputtering
G. Carter and M.J. Nobes 456
Ion bombardment induced topography evolution on low index crystal surfaces of Cu and Pb
L. Tanovic, N. Tanovic, G. Carter and M.J. Nobes 462
Collision cascades in Cu, Au and Cu_3Au: a comparison between molecular dynamics and the binary collision approximation
M. Hou and Z. Pan 468
Molecular dynamics simulations of inelastic energy loss effects in sputtering
M.H. Shapiro and T.A. Tombrello 473
Sputtering of metal alloys at elevated temperatures
L.B. Begrambekov and A.M. Zakharov 477
Collisional desorption of Cs^+ and CsX^+ ions from GaAs by Cs^+ impact
E.W. Thomas and D. McPhail 482
SIMS study of implantation-induced boron redistribution in silicon
S.P. Wong, V.C. Lo and Y.W. Lam 487
Erosion of graphite and graphite compounds under oxygen gas and light ion irradiation
L.B. Begrambekov, S.V. Vergazov, A.M. Zakharov and M.A. Morochev 491
Total sputter yield of LiF induced by hyperthermal ions measured by a quartz microbalance
T. Neidhart, Z. Toth, M. Hochhold, M. Schmid and P. Varga 496
Comparison of secondary ion emission induced in silicon oxide by MeV and keV ion bombardment
H. Allali, B. Nsouli, J.-P. Thomas, F.W. Szymczak and K. Wittmaack 501
Reflection and self-sputtering of nickel at oblique angles of ion incidence
E. Hechtl, W. Eckstein and J. Roth 505
The statistics of sputtering
M.T. Robinson 509
Measurement of emission-angle-resolved time-of-flight distributions of sputtered Mg^+ ions
K. Franzreb and J. Fine 513
Neutral copper cluster sputtering yields: Ne^+, Ar^+ and Xe^+ bombardment
S.R. Coon, W.F. Calaway and M.J. Pellin 518

Section VII. Secondary emission and optical radiation

Electron emission induced by slow highly charged ions on a clean metal surface
F. Aumayr and H. Winter 523
High-energy shadowing effect and its application to atomic and solid state physics
H. Kudo, K. Shima, T. Ishihara, H. Takeshita, Y. Aoki, S. Yamamoto and H. Naramoto 533
Plasmon effects in the particle-induced kinetic electron emission from nearly-free-electron metals
M. Rösler 537
Charge state of atomic particles ejected from solid surfaces: influence of initial conditions
D. Klushin, M. Gusev and I. Urazgil'din 542
Measurement of time-of-flight spectrometer efficiency for light ions at medium energies
J.H. Arps and R.A. Weller 547

Monte Carlo study of incident-angle dependence of ion-induced kinetic electron emission from solids
K. Ohya and J. Kawata 552
Continuum optical radiation produced by H^+ and He^+ ion bombardment of pyrolytic boron nitride
H. Kobayashi, H. Shibata and S. Tagawa 556
Forward/backward secondary electron emission from foils by swift ion impact
T. Kaneko and Y. Mitsunobu 560
Al target 2p electron excitation in asymmetric collisions with very low energy Ne^+ projectiles
F. Xu, N. Mandarino, A. Oliva, P. Zoccali, M. Camarca and A. Bonanno 564

Section VIII. Related topics

Positron and electron solid interactions
P.J. Schultz, G.R. Massoumi and W.N. Lennard 567
Ion beam analysis of hydrogen molecular motion
M. Zinke-Allmang and O. Kruse 579
High-energy asymptotic forms for partial derivatives of phase shifts with respect to angular momentum
S.R. Valluri and W.J. Romo 589
Evaluation of non-Rutherford cross sections
H. Shen, H. Cheng, J. Tang and F. Yang 593
PIXEF: the Livermore PIXE spectrum analysis package
A.J. Antolak and G.S. Bench 596
A realistic PC-program for RBS simulation and data analysis
Q. Yang 602
Forward elastic recoil measurements using heavy ions
R. Siegele, J.A. Davies, J.S. Forster and H.R. Andrews 606
